RenaTa Cebular

*"Creativity is not only about the art.
It is pureness in each of us - as passion,
love for play and free expression."*

RenaTa Cebular (pronounced Che-bou-lar) is a Swiss / Croatian artist, living and working in Zurich, Switzerland. For the past 6 years RenaTa has been working under the name of Art By Cebular in Fine Art, Fashion Design, Textile Design, Interior Design, Public Places, Art and Culture Projects. Her work and experience are diverse and include creating original works of art, working on paper and silk, activities in different galleries, intuitive drawing and creativity. She also works collaboratively with external partners and consults on business concepts using lateral thinking and creativity.

In 2011, RenaTa completed a Postgraduate study at Zurich University of the Arts, Department of Cultural Analysis. This study helped RenaTa to form the basis of her business idea for developing Cebular Lifestyle Gallery. It is based on reconceptualization of art to express the aesthetic in multi-functional daily living objects. RenaTa's motto is to work "**Out of Simplicity**" to reach the patterned complexity she achieves on her objects. Since early childhood RenaTa has expressed her sense of design by drawing on different objects to individualise them. She embellished the objects around her and developed a propensity to modify the environment adding beauty, colours and visual geometric shape to everyday objects. She used simple pencil and crayons and discovered the possibility of doing more out of simplicity. The free hand swing is the foundation of her drawing technique. The gentle, harmonious lines crossing and meeting each other in different patterns contributed to characterise her particular geometric sign.

Exclusive Home Range

Individually tailored to meet the Interior Design requirements of the truly discerning client...

ARTIST STATEMENT

The free hand swing resulted in being the foundation of my drawing technique. The gentle, harmonious lines crossing and meeting each other in different patterns contributed to characterise my peculiar sign. The "game" with the surface, which enlarges and shrinks itself, was more and more tempting to me in order to create depths, shadows and surfaces. In this way I came to three-dimensional images. The next step came with the combination of different tones. Gradually, the drawings became denser and some fluorescence colour patterns were drawn on black paper.

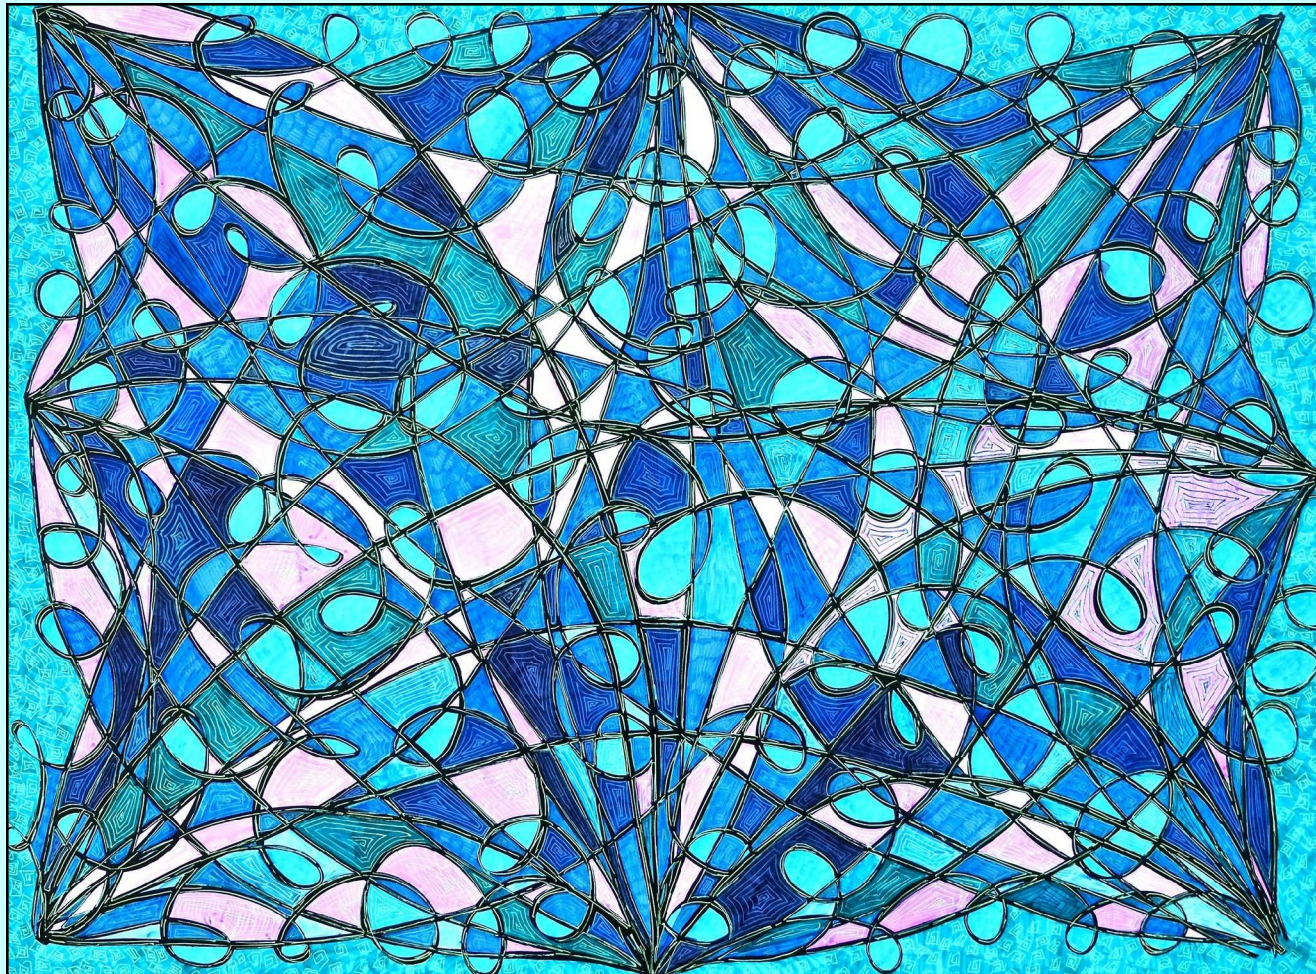

I work without templates, sketches, or aids. My technique is to draw the basic patterns at the beginning, using both hands, as if everyday doodle has taken a wonderful turn and been transformed into a fine art.

My artwork comes to life in the timelessness and harmony of the moment; patterns and shapes, colours and lines flow into each other to form a holistic meaning, get their place and vibrancy, chaos and order, into a whole.
